ARCH TECHNOLOGIES

Sharpening your hidden skills for a brighter future

Full Stack Development

Full Stack Development involves learning to build and maintain websites using languages like HTML, CSS, JavaScript, and frameworks like React or Django. You'll master front-end design, back-end logic, and database integration to create responsive, user-friendly sites. It's important for establishing online presence, enabling businesses to reach global audiences, and driving digital innovation across industries.

Task 3: Personal Portfolio

- Introduction: Introduce yourself and state your ambitions.
- Background: List your education and key certifications.
- Projects: Showcase a variety of projects with descriptions, roles, tech used, and outcomes.
- Skills: Display your technical and relevant abilities.
- Experience: Detail work history, responsibilities, and contributions.
- Testimonials: Add endorsements if available.
- Blog/Articles: Include links to demonstrate communication skills.
- Achievements: Feature awards and honors.
- Contact: Provide contact info and LinkedIn profile.

Task 4: To-do-list

- Build a simple to-do list application that allows users to add, edit, and delete tasks.
- You can use HTML, CSS, and JavaScript for the front-end and store the tasks in local storage or a simple backend server using technologies like Node.js or Flask.

Submission Details:

- Make a ZIP or RAR file of the Code or any related things (if any), or share a GitHub repository link. Email it to submissions.archtech@gmail.com before the 27th of this month.
- For any technical queries or challenges faced during task completion, Email your questions to queries.archtech@gmail.com Our team will do our best to assist you.
